IBC Cleaning Tools

- ✔ Insert and click to clean - 525+ cleans per unit
- ✔ Cleans LC, SC, MTP® male and female connectors and inside adapters
- ✔ Suitable for multimode and single-mode (8°APC)

The US Conec IBC™ Brand Cleaners are mechanical cleaning tools designed to clean connectors residing in an adapter or faceplate and unmated connectors. The IBC™ Brand Cleaning tools use a novel dry cleaning strand to gently sweep and lift away dust and residues from the connector end face.

CLETOP Cleaning Tools

- ✔ Replacement reels are easy to install and reduce the cost per cleaning
- ✔ 400+ Cleanings
- ✔ Eliminates electrostatic charge

The CLETOP and CLETOP-S are cassette style fibre optic connector cleaner systems that can be refilled for reducing cleaning costs. They use densely woven micro-fibre cleaning fabrics to remove harmful contaminants off of the ferrule end face. The CLETOP and CLETOP-S cassette cleaning tools will accommodate all single fibre connections.

OPTIPOP Cleaning Tools

- ✔ Replacement reels are easy to install and reduce the cost per cleaning
- ✔ 400+ Cleanings
- ✔ Eliminates electrostatic charge

The OPTIPOP R is a cassette style fibre optic connector cleaner system that can be refilled for reducing cleaning costs. It uses a densely woven micro-fibre cleaning fabric to remove harmful contaminants off of the ferrule end face. The OPTIPOP R cassette cleaning tool will accommodate all single fibre connections.
