

Accessories - Test/Inspection

Fibre Inspection Probe

- ✔ Automatic fibre-connection detection
- ✔ Automatic fibre image centering system
- ✔ Automatic focus adjustment and optimisation
- ✔ Automatic image capture
- ✔ Automatic connector endface analysis and reporting

Part Code:

EX-FIP-XXX

Visual Fault Locator

- ✔ Universal connector types
- ✔ 650nm (nominal) laser wavelength
- ✔ Power - 10mW
- ✔ 40 hours typical operation in continuous mode with low battery status indicator

Part Code:

(VFL)= CSM-620013

(1.25mm Adapter) = CSM-09-042

Elite Test Reference Patchleads

- ✔ Low insertion loss, high return loss
- ✔ A Grade connectors -Typical: 0.06dB Max \leq 0.10 dB
- ✔ Optimised geometry and enhanced optical performance

Fibre optic test reference cables are terminated in our specialist UK facility. Our test reference cables are manufactured with optimised geometry and all test reference patchleads use Mapped, High Grade connectors which are finely tuned for increased optical performance.
